

Why Contribute to ONE Network

ONE Network is a tokenized, social media platform that will bring privacy and control of a user's own content and data. Our platform will allow for millions of users and content creators to reward, buy and exchange digital tokens from directly within the platform without the use of centralized entities. ONE is powered by the Onebit token (OBT) and built on top of Blockchain Technology to secure freedom of expression for the Next Generation.

ONE's Platform Features

Public/Private Social Feeds

Public/Private Chat

Public/Private GPS

Multi-Wallet

Encryption

Anonymous Capability

Timer

Marketplace

Content Rewards

Voluntary Ad Platform

And much more...
